Pressure Diagnostics II

Course Description:

This one day training will provide the participant with an understanding of advanced pressure diagnostics analysis and includes both classroom and laboratory experience. Participants will use the Minneapolis Blower Door to perform zonal pressure diagnostics to locate solutions to ineffective energy problems with the residential environment.

Length of Session:

This is a one day training class. The first ½ day is classroom based and the second ½ day takes place in the lab or field.

Suggested Prerequisites:

Energy Basics and Pressure Diagnostics I.

What you will learn by taking this course:

This is an advanced pressure diagnostics class. Participants will learn about buffer and pressure boundaries; how to use pressures to determine duct locations; how to find holes and how to use pressures to determine when to fix holes; using pressures to determine leakage amounts; and how to align thermal and pressure boundaries and more.

Registration Fee:

\$200.00 per attendee.

This is a NON Certification course approved by the Building Performance Institute. 8 CEU units.

To schedule a class, please contact the **Southwest Building Science Training Center** at **602-532-2976 ext. 3**.
